

Solar Breeze

Attic Fans

Commercial Curb Mount Solar Attic Fan

Attic venting is an important aspect in maintaining an energy efficient commercial building or warehouse. Proper venting cools the roof, extending the life of the roofing material and reduces the load on the air conditioning system. Powered completely by free solar energy, this sleek and efficient vent is both compact and quiet. The commercial fans are available in 20, 30 or 50 watt models and are powdercoated black. Fully operational right from the box, the installation of the commercial unit requires no electrical wiring, but the unit must be installed on a pre-built curb.

50 Watt Solar Attic Fan

The 50 watt fans have an unmatched venting capacity of up to 3,100 sq. ft. for those larger jobs that require the most powerful and reliable solar attic fan on the market today. The 50 watt fans are powered by a remote solar panel installed directly onto the roof in the location where it will collect the most amount of sunlight.
